

HALL AIRPORT

10:00 Opening ceremony

10:15 The ceremony of rewarding the winners of third national award "Airgateways of Russia"

11:00 Plenary session "Trends in the development of Russian aviation industry: external and internal factors of influence"

- international cooperation and integration processes in the aviation industry;
- improving the system of state regulation of aviation and aviation activities;
- updating of aviation legislation: implementation of economically justified policies in the field of civil aviation;
- development of airport infrastructure in Russia;
- formation of effective airport management models;
- formation and implementation of investment infrastructure projects aimed at the development of Russian Federation airports;

Invited Speakers: Ministry of Transport of Russia, Federal Agency of Air Transport, USA Aviation administration (FAA), Aviation authorities of Republic of Turkey, Aviation authorities of Republic of Egypt, PJSC "Aeroflot", Airline "S7" Airline "UTair", Airports of Moscow Aviation Hub and others.

14:00 Forum "Travel Routes Russia"

- support mechanisms for tour operators, providing an increase of the tourist flow in the priority destinations in Russian Federation;
- domestic tourism promoting : constraints and prospects;
- Improving of transport accessibility of tourist and recreational facilities and tourist objects;
- expansion of internal tourism network as a factor of domestic air transportation growth;
- financial support models for airlines on domestic routes (subsidies, zero VAT rate);
- dynamics and distribution of tourist traffic in Russian Federation 2014-2016 yy.;
- internal travel routes planning for the spring-summer 2017 period

Invited speakers: Federal Air Transport Agency, Federal Agency for Tourism, Ministry of Russian Federation for the North Caucasus, Ministry of Russian Federation for the Far East, State Committee of the Republic of Tatarstan on Tourism, Ministry of resorts, tourism and the Olympic legacy of the Krasnodar Territory, Ministry of Enterprise Development and Tourism of the Republic of Sakha (Yakutia), Russian Union of Travel Industry, Airline "UTair", Airline "Russia", Airline "S7" airline Red Wings, Airline "Ural Airlines", NTK Intourist and others.

8 February 2017

HALLTAKEOFF

10:00 Round table "Informal meeting of representatives of ICAO with Russian from companies Aeronautical Industry"

13:00 Round table "Fundraising in the development of Russian airports"

- regional development strategies: opportunities for the application of concession mechanisms , Russian and foreign investment attraction investments in the airport infrastructure;
- potential and shortcomings of the concession law with regard to the airport segment;
- use of optimal investment forms of interaction between the state and the operator;
- measures of state support in the application of concession model, risks management.

Invited speakers: FSUE "Administration of Civil Airports (airfields)", Federal Center for Project Finance (Vnesheconombank Group), Russian Direct Investment Fund; Law firm VegasLex, Law firm Herbert Smith Freehills, ANO "Directorate of Moscow transport hub", ANO "Management of development of St. Petersburg transport system and Leningrad Region", operators of Russian airports.

15:30 Round table "Innovative technologies of designing, construction and operation of the airfield infrastructure"

- improving the regulatory framework of design, construction and operation of airport infrastructure;
- design automation to support planning of airport complexes development;
- topical issues of pricing in construction;
- diagnostics and modern methods of airfield pavements repair;
- advanced technologies, equipment and materials used in the construction and reconstruction of airports from the point of view of economic expediency.

Invited Speakers: Ministry of Construction of Russia, Federal Air Transport Agency, Federal State Unitary Enterprise "Administration of civil airports (aerodromes)" FAA "Federal center of price formation in construction", the Technical Committee for Standardization Rosstandart, JSC "Sheremetyevo International Airport", holding "Airports of the regions", GC "Spectrum", FGUP GPI and NII GA "Aeroproject", JSC "PliNII BT" Lenaeroproject "Group" HEHUA "companies, JSC" Airport Yuzhno-Sakhalinsk ", LLC" TSM ", JSC" Geostroyizyskaniya "and others.

HALL AVIATOR

14:00 Conference "Topical issues of transport (aviation) safety"

- normative legal regulation in the field of transport security;
- procedure of preparation and certification of transport security forces, problematic issues;
- accreditation issues of transport security units;
- implementation of the requirements in the field of air transport security during the World Cup in 2018;
- problematic issues of the certification procedure in the field of aviation security;
- preparations for the ICAO inspection in 2017.

HALL AIRPORT

10:00 Conference "Legal framework and practical aspects of the use of drones"

Session 1. Formation of the legal framework on the use of drones.

- review and analysis of regulatory and procedural issues priority, requiring solutions in air law;
- prospects of commercial use of drones, development of unmanned aircraft to major airlines structure;
- mandatory and voluntary certification of unmanned aircraft systems. Time and procedure for the recognition of certification results;
- training and certification of unmanned aircraft systems experts (external drivers / operators);
- registration and accounting of unmanned aircraft. Terms and procedures;
- third party liability insurance and insurance of damage and loss of drones - barriers solutions, especially.

Session 2. Technical and organizational solutions in the field of unmanned systems

- training program for drones operators;
- equipment for unmanned aircraft.

Invited speakers: Russian Ministry of Transport, Federal Air Transport Agency, Aviation Administration of the United States Aviation, Administration Denmark, Roscosmos, GosNIIAS, Association of operators and developers of unmanned aircraft systems, and others.

HALL TAKEOFF

12:00 Round table "Airport non-aeronautical activities management"

- non-aeronautical revenues - new opportunities for the airport business;
- management paradigm "passenger - the client";
- passenger satisfaction as the leading driver of growth of airport non-aeronautical revenues;
- range and quality of additional services for passengers: parking, business facilities, hotels, retail, catering, vending;
- effectiveness of airport non-aeronautical activities.

HALL BLUE

10:00 International Forum "Development prospects of Global Air Navigation"

- global vision of air navigation system development over the next 5 - 10 years;
- modernization methodology of aviation system (ASBU) and development of the Global Air Navigation Plan (GANP). Future requirements and characteristics of the air traffic management (ATM);
- implementation of PBN (navigation, based on the characteristics) and development of navigation equipment;
- Aerospace industry: construction of new air navigation systems;
- global standardization and road maps for avionics and ground equipment;
- The results of the 39th ICAO Assembly and Aeronautical work program for the next triennium.

Invited speakers: leading experts of the International Civil Aviation Organization (ICAO) and the International Coordinating Council of Aerospace Industries Associations (ICCAIA)

HALL ORGANIZATION OF AVIATION FUEL SUPPLY OF CIVIL AIRCRAFT

10:00 Conference of organization of aviation fuel supply of civil aircraft

10:00 **Conference "Innovative Airport: efficiency technologies"**

"Modernization of airports and airlines IT-infrastructure. New technological solutions "

- systems that provide internal business processes (ERP, ECM, MES, etc.);
- CRM-systems and project management system;
- transaction database (AODB);
- Resource Management System (RMS);
- Business Intelligence (BI-solutions).

"Improving the quality of passenger service and cargo"

- contact centers;
- systems for checking documents;
- passenger and baggage check systems DCS;
- luggage and Inspection system solutions for the control-boarding (self-boarding);
- mobile applications and information kiosks;
- systems which display information about flights (FIDS) and equipment;
- automatic voice announcements (AFA) and equipment;
- equipment and technologies for improving efficiency in work with passengers and cargo.

"Automation of airport design and construction. Simulation modeling of airport technological processes . Automation, scheduling and management of engineering systems "

Invited speakers: JSC "Airport Vnukovo", JSC "Sheremetyevo International Airport", holding "Airports of the regions", JSC "International airport" UVA "PCF" Airports of the North », SITA, Rohde & Schwarz GmbH & Co, Parking Solutions IJU, etc.

13:00 **Conference on "Legal and practical aspects of aircraft and airports equipping with modern satellite equipment"**

- support of development and use of system GLONASS till 2020;
- advanced onboard and ground systems on based augmentation systems and differential correction (ABAS, GBAS);
- satellite control positioning system (satellite trackers);
- finalization of the aircrafts in aviation and electronic equipment (piloting, board, navigation).

Invited speakers: Federal Air Transport Agency, Federal State Unitary Enterprise "State Research Institute of Civil Aviation" NPPF "SPECTRUM", RDC and other companies.

15:00 **Conference "New anti-icing technologies for aircraft"**

- improving regulatory and methodological framework for the aircraft protection from ground icing;
- use of modernized ground support equipment, enhanced anti-icing liquids and laboratory facilities with the aim of high quality to protect the aircraft from ground icing;
- certification of personnel involved in the procedures of aircraft anti-icing treatment;
- cooperation with international non-governmental organizations working in the field of aircraft protection from ground icing, and participation in their work.
