

Job Title: Chief Technical Officer (CTO) / Technical Director - Aluminum Foil Production Plant

Location: Yerevan, Armenia

Overview:

We are seeking a dynamic and experienced Chief Technical Officer (CTO) or Technical Director to lead the technical operations of aluminum foil production plant. The ideal candidate will possess a strong background in industrial engineering, process optimization, and strategic planning to drive efficiency, increase production volumes, and enhance the scope of our end products. This role requires a visionary leader who can assess our current production processes, develop detailed optimization plans aligned with international best practices, and implement initiatives to achieve operational excellence.

Key Responsibilities:

Assess Existing Production Process:

- Conduct a comprehensive evaluation of our current production processes, identifying inefficiencies, bottlenecks, and areas for improvement.
- Analyze production data, quality control metrics, and equipment performance to identify opportunities for optimization.
- Collaborate with cross-functional teams to gather insights and feedback on current processes.

Develop Optimization Plan:

- Develop a detailed optimization plan that encompasses all relevant processes of the production lifecycle, from raw material sourcing to product packaging.
- Research and benchmark against international best practices in aluminum foil production to identify innovative strategies for optimization.
- Prioritize initiatives based on potential impact, feasibility, and resource requirements.

Action Plan for Efficiency Increase:

- Create an action plan to increase efficiency throughout the production process, including streamlining workflows, reducing waste, and improving resource utilization.
- Implement continuous improvement methodologies such as Lean Six Sigma to drive sustainable efficiency gains.
- Establish key performance indicators (KPIs) to monitor progress and ensure accountability.

Implementation Action Plan:

- Present optimization plans to shareholders and key stakeholders, gaining buy-in and alignment on objectives and timelines.
- Develop a detailed implementation action plan, including resource allocation, timeline milestones, and risk mitigation strategies.
- Lead cross-functional teams in executing initiatives, providing guidance and support to ensure successful implementation.

Enhancement of Production and Investment Directions:

- Identify opportunities for further enhancement of production capabilities and expansion of product offerings.
- Identify investment opportunities and strategic growth areas.
- Develop a detailed action plan for investment in new technologies, equipment upgrades, and process innovations to enhance the scope and quality of our end products.

Overall Objectives:

- Optimize existing production processes to improve efficiency, reduce costs, and increase production volumes.
- Develop and implement strategic initiatives to enhance the competitiveness and sustainability of our aluminum foil production plant.
- Drive continuous improvement and innovation to maintain our position as a leader in the industry.

Requirements:

- Experience in project management and leading cross-functional teams.
- Proven track record of successfully optimizing production processes and driving efficiency improvements.

Will be considered an advantage:

- Bachelor's or Master's degree in Engineering, Industrial Management, or related field. PhD preferred.
- Minimum of 10 years of experience in a senior leadership role within the manufacturing industry, with specific experience in aluminum foil production preferred.
- Strong analytical skills with the ability to interpret complex data and develop actionable insights.
- Excellent communication and interpersonal skills, with the ability to collaborate effectively across all levels of the organization.
- Strategic thinker with the ability to develop and execute long-term plans to achieve business objectives.
- Familiarity with international quality standards and regulations related to aluminum foil production.
- Ability to adapt to changing priorities and thrive in a fast-paced, dynamic environment.
- Demonstrated leadership qualities, including integrity, accountability, and a commitment to excellence.
- Languages: English, Russian
- Duration: 1+ years
